ABOUT ME

Just a simple student developer who likes building things and innovating things that can change the worlds and is into programming, great at various sectors too.

ACHIEVEMENTS

Gold Medal
WICE 2025 - Malaysia - SEGI University
2025

Best IT Project
Codeavour National Round Carnival 26
2026

3rd Place
Notre Dame Annual Science Fair
2025

Bronze
BSCIR National Science Fair
2025

SKILLS

- Web Development
- Mobile App Development
- Robotics Engineering
- Graphic Designing
- DSA Expertise
- Competitive Programming
- Machine Learning

LANGUAGE

- English (Fluent)
- Bangla

PROJECTS

LifeSphere *2026 - Presents*

An all in one ecosystem to make life safer, comfortable, healthier

- LifeSphere is built for the busy, elderly, disabled, single-person households, its project of combining medicine-dispenser, health monitoring, automation, security, robotics, mental-health AI to support independent living, It uses SLAM, AI/ML, Flutter, Firebase, IoT, Arduino, C++, Python, Flask, Raspberry PI.

Big-O-Tracker *2026 - Presents*

A Big O Notation Tracker

- Its a simple Big-O-Notation tracker for competitive programmer

Hollow AI *2025*

A system built for better control over your space

- HollowAI was built for especially for elderly and disabled. it contains automation, medicine-dispenser, AI-Assistant, security to support peoples who are disabled, elderly etc. It evolved to LifeSpher. It uses Flutter, AI, Firebase, IoT, Arduino, Python, Flask.

Fight4Code *2023/24*

A Competitive Programming site taking a look of a video game

- A site where all of the of the CP site problems are stored in one place, you can do duels or team fight with peoples and win in video games way by making a faster code then the opponent, you can practice, learn DSA like its a video game.

SortRace *2023*

A visualized sort race

- Its a simple sort race that can give visualized race between sorting algo.

TECH STACK

Languages
JavaScript, TypeScript, C++, C#, PHP, Dart, Java, Python, Kotlin, Lua, GO

Front-End
React, Vue.js, Laravel, Angular, Flutter

Back-End
Fast API, Rest API, .NET, Node.JS

Database
Supabase, MySQL, PostgreSQL, Firebase, MS SQL, ORACLE, MongoDB

Robotics
Arduino, Sensor Fusion, SLAM, IoT, Raspberry PI

Tools - Clouds - AI/ML
Docker, AWS, Figma, Vercel, Google Cloud, Shopify, TensorFlow
